COMPUTER HARDWARE AND SOFTWARE

Versus Informatique

Montreal-based Versus Informatique Inc., a supplier of e-business and direct marketing hardware and software, has raised first-round financing from Groupe Topping. Terms of the financing were not disclosed, though Groupe Topping will receive a 30% equity position in Versus, which is expected to have sales of \$2.5 million by the end of August. Funding will be used for ongoing operations. The company said it expects to raise a second round of financing later this year to strengthen its position in the Canadian and U.S. markets along with Europe. — David Shabelman (The Daily Deal)
